PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

This military installation, in the southeast sector of Yemilchino (Figure 1), 33 kilometers (km) northeast of Novograd-Volynskiy, covers approximately 80 acres and is served by all-weather roads.

The installation (Figures 2 and 3) contains the following major buildings: four multistory barracks, two single-story barracks, two multistory administration buildings, four single-story administration buildings, four vehicle storage

buildings, one vehicle maintenance building, seven storage buildings, and three support buildings. Training facilities include an athletic field and a small arms range.

The installation is active and appears unchanged since [REDACTED] however, better photography on later missions allows identification of buildings which are not new but could not be seen on earlier missions.
